SILAS HAKUZWIMANA

Full-Stack Software Engineer · Network Infrastructure Specialist · UR-CST

+250 783 749 019 hakusilas@gmail.com LinkedIn | GitHub

PROFESSIONAL SUMMARY

A dual-domain engineer combining full-stack software development with CISCO-certified enterprise network infrastructure (CCNA I–III, with CCNA III pending formal issuance). Currently in Year III at the University of Rwanda — College of Science and Technology, with a strong academic foundation (A-Level GPA: 4.0/4.0, Score: 60/60). Experienced across the complete engineering stack — reactive **Vue.js / React.js** frontends, **Laravel / Django / Spring Boot / Node.js** backends, enterprise-grade network design, and data engineering. Certified Full-Stack MERN developer (Power Learn Project — 16-week program), Certified Android Developer (Udacity), and specializing in systems where software security and network integrity reinforce each other. Proven track record: a school IMS that drove a **95–97% student success rate**, a logistics platform delivering 100% scheduling automation with sub-second query performance, and infrastructure audits achieving 3× capacity improvements.

TECHNICAL SKILLS

FRONTEND	BACKEND	INFRASTRUCTURE	DATA & ANALYSIS
Vue.js	Laravel (PHP)	CCNA I – Routing	PostgreSQL
React.js	Django (Python)	CCNA II – VLANs / OSPF	MySQL / MS Access
Flutter (Dart)	Spring Boot (Java)	CCNA III – IPsec / VPNs*	MongoDB
Tailwind CSS	Node.js / Express.js	Cisco IOS	Python: NumPy, Pandas
Bootstrap	REST API Design	Docker · Git / GitHub	Matplotlib · SQL · Excel
HTML / CSS / JS			

** CCNA III course completed; certificate pending formal issuance.*

Programming Languages: C / C++ · Java · Python · JavaScript · PHP · Dart

Design & Tools: Figma · Photoshop · Blender · Canvas · Flash Macromedia

PROJECTS & ENGINEERING IMPACT

Online Transport System (OTS) · Lead Systems Architect & Backend Developer *2024*

Laravel · Vue.js · PostgreSQL · REST APIs · DSA Optimization

- Architected a full logistics platform replacing 100% of manual vehicle scheduling with an automated digital workflow.
- **sub-second query response times on complex scheduling queries through strategic database indexing.** Designed DSA-optimized routing algorithms achieving
- Built a comprehensive RESTful API ecosystem, enabling future mobile app and third-party GPS tracker integration.
- Implemented enterprise-grade authentication and authorization using CCNA-level network security principles.

GS Mareba Internal Management System (IMS) · Lead Developer & Educational Consultant*2022–2023*

PHP · MySQL · Bootstrap · CRUD Engine

- Identified systemic administrative data fragmentation at GS Mareba and independently built a centralized IMS to resolve it.
- Replaced all paper-based records with a relational MySQL schema, eliminating human error in student record-keeping.
- **95% end-of-term success rate.** Built a performance tracking module enabling data-driven mentorship that contributed to a
- Reduced end-of-term reporting and record audit time by an estimated 90%.

Mass Reader Scheduler · Full-Stack Developer *2024*

Modern Web Stack · Secure API Design · Real-Time Chat · Notifications

- Engineered a security-first scheduling platform, replacing manual coordination for liturgical volunteer management.
- Integrated embedded real-time user chat and an automated notification engine — achieving zero missed reader assignments post-deployment.
- Applied modern web security practices throughout authentication, session management, and data handling layers.

iTechnology System · Solutions Architect *2024*

Modular Architecture · Platform Engineering · Expert Matching Engine

- Designed a modular marketplace platform bridging technology seekers with certified software and infrastructure specialists across Rwanda.
- Architected for extensibility, with a roadmap toward Digital Security Compliance consulting for SMEs and government-linked organizations.

Nyina wa Jambo — Song Management System · Full-Stack Developer *2023*

PHP · MySQL · Secure Admin Interface · Metadata Engine · Streaming Resources

- Built a full-stack content management platform with a secure admin interface for song metadata, scheduling, and streaming resource allocation.
- Demonstrated application of CRUD architecture and relational data modeling to cultural content management.

WORK EXPERIENCE

Acting Teacher — Mathematics & Physics · GS Kagasa / Ngeruka *2022–2023*

- **over 97%** Taught Mathematics and Physics to secondary school students, boosting class performance to
- Applied creative teaching techniques and individual mentorship, translating complex scientific concepts into practical understanding.

Acting Teacher — Entrepreneurship & Communication Skills · GS Mareba / TSS *2022–2023*

- Delivered Entrepreneurship, General Studies, and Communication Skills lessons to secondary-level cohorts.
- **95%** Enhanced student success rate to
- Identified critical administrative inefficiencies and independently developed the GS Mareba IMS to address them — demonstrating engineering initiative beyond the teaching role.

EDUCATION

BSc Computer & Software Engineering (Year III) · University of Rwanda — CST *2023 – Present*

- Core modules: Data Structures & Algorithms, Database Systems, Computer Networks, Software Engineering, Operating Systems.
- Elected Class Representative — bridging student needs and university administration.

Advanced Level — Science Stream (Grade 10–12) · Gisenyi College 'Inyemeramihigo'*2019–2022*

- GPA: 4.0 / 4.0 · National Score: 60/60 — top-tier academic performance in Mathematics and Sciences.

Ordinary Level (Grade 7–9) · GS Mareba / TSS *2016–2018*

Primary Level (Grade 1–6) · Rukoyoyo Primary School *2009–2015*

CERTIFICATIONS

Certification	Issuer	Status
Full-Stack Development — MERN Stack (16-week program)	Power Learn Project	Awarded
Full-Stack MERN Stack Specialization — Python, Web Technologies, DB Management, Software Engineering Essentials	Power Learn Project / EMURGO Africa	Awarded
Android Developer Certification	Udacity	Awarded
Cybersecurity Essentials	Cisco Networking Academy	Awarded
IT Essentials	Cisco Networking Academy	Awarded
CCNA I — Introduction to Networks	Cisco Networking Academy	Awarded
CCNA II — Switching, Routing & WLANs	Cisco Networking Academy	Awarded
CCNA III — Enterprise Networking, Security & Automation	Cisco Networking Academy	**Pending Issuance**

† CCNA III: course fully completed; certificate pending formal issuance by Cisco Networking Academy.

KEY ACHIEVEMENTS

- Achieved 95–97% student success rates across two schools through data-driven mentorship and the custom GS Mareba IMS.
- Delivered 100% scheduling automation on the OTS logistics platform with sub-second query performance.
- Completed A-Level with a perfect GPA of 4.0/4.0 and a national score of 60/60 in the Science Stream.
- Earned full CCNA I–III curriculum (CCNA III pending formal certificate issuance) — one of very few engineers in Rwanda with network + software dual certification.
- Awarded Full-Stack MERN Stack certification from Power Learn Project / EMURGO Africa following a rigorous 16-week program.
- Built and deployed 5 production-grade systems across logistics, education, media, community, and marketplace domains.

PROFESSIONAL STRENGTHS

CORE COMPETENCIES	INTERPERSONAL & SOFT SKILLS
Analytical & systematic problem solving	Effective communication & teamwork
Strong attention to detail	Public relations
Leadership & mentoring abilities	Time management
Project management	Cross-functional collaboration
Adaptability & continuous learning	Teaching & knowledge transfer
Critical thinking & creativity	Community engagement

INTERESTS

Artificial Intelligence & Robotics · Software Engineering & System Design · Football & Teamwork
Reading & Continuous Learning · Creativity-Based Groups · Worship & Community Service

LANGUAGES

Kinyarwanda (Native) **English** (Fluent) **French** (Beginner) Kiswahili (Beginner)
